

The SUMO Speaker Series for Undergraduates

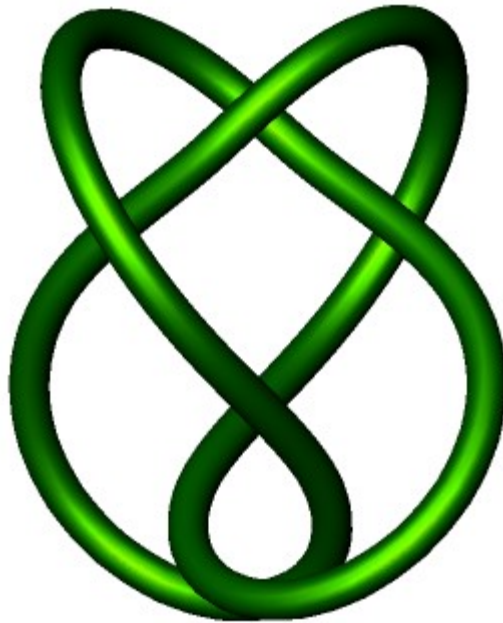

(food from Pizza Chicago)

Wednesday, April 8th

5:15-6:05, room 380C

Knots, Links, and Braids

Professor Ralph Cohen

ABSTRACT:

I will discuss various aspects of the topological study of knots and links. I will describe certain algebraic invariants, and also discuss how knots and links are related to a certain family of groups discovered by Emil Artin in the 1920's: the Braid groups.
