

## The SUMO Speaker Series for Undergraduates

Thursday, January 17<sup>th</sup>

4:15-5:05, room 380C

*(Food Provided)*

### The Banach-Tarski Paradox

Professor Brian White

#### ABSTRACT:

A solid ball can be cut into finitely many pieces that can be rearranged to form two solid balls, each of the same size as the original ball. I will discuss the proof and what it means.
