

The SUMO Speaker Series for Undergraduates

Friday, November 2nd
4:15-5:05, room 380C
(Food Provided)

Cool theorems in number theory proved by undergrads

Professor Ken Ono

ABSTRACT:

The speaker will describe some very cool theorems which have been proved by undergraduates. These will include very pretty (and technical theorems) on the distribution of prime numbers, number fields, and unimodal sequences. This will be a fun talk about some accessible (but deep) theorems.
