

Dropping Singles

Fill in the squares so that:

1. The number indicates the number of filled squares in each region.
2. All the filled squares within a region are adjacent to each other. (In this case, "adjacent" only refers to vertically and horizontally touching squares, not diagonally touching squares.)
3. Adjacent squares in different regions cannot both be filled.
4. All the filled squares are dropped straight down, they should completely fill up the bottom 3 lines of the grid. All the squares in a region drop as one entity.
