

FOLDING ANIMALS
 SOLUTION

After folding the paper, they can be pieced together to complete each animal. The number and letters inside each animal are as shown, with no particular ordering.

Note: the frog looks slightly deformed but the inside characters should not be affected.

Animal	Letters inside animal
Octopus	F149
Cat	1431
Whale	1F43
Pig	1F74
Frog	F834

The visible red letters read UNICODE (orienting the red arrow to face upwards). The unicode encoding for each animal emoji are as follows, ordered alphanumerically by unicode.

Emoji name	Emoji	Unicode
Octopus		U+1F419
Cat face		U+1F431
Spouting whale		U+1F433
Pig face		U+1F437
Frog face		U+1F438

Notice that each unicode string has one extra digit compared to the digits found inside each animal in the folded papers. In this order, the digits form 1F331, which is the unicode for seedling.

The answer is: **SEEDLING**
