

The SUMO Speaker Series for Undergraduates

Thursday, April 14
4:30 – 5:20pm, Bldg. 380, room 384H

(Food Provided)

Waves

Professor Andras Vasy

Abstract

I will discuss different kinds of waves from the simplest(-seeming) waves on string to their higher dimensional analogues on membranes, electromagnetic waves, elastic waves and gravitational waves. What are the similarities and what are the differences?
